ABOUT MAP EDUCATION

MAP Education offers students aged 11-16, who are having difficulty accessing mainstream education, the opportunity to study Art and Design and Music and Creative Media, alongside Maths and English.

MEETING NEEDS

At MAP we work closely with schools, homes and a range of supporting agencies to provide placements that meet a range of needs:

- Supporting students who are being assessed for EHCP and specialist placements.
- Short term KS3 placements with a focus on returning to mainstream education.
- Longer term placements studying BTEC qualifications and functional skills.
- Providing places for students who are between long term placements, changing schools or moving between providers.
- Supporting students who are attending education after a long period of disengagement.

FUNCTIONAL SKILLS

Within all of these subjects there are many examples of Maths and English and we provide one to one support from an assessor to help students build upon these examples and study for stand alone functional skills qualifications.

WHAT WE DO

CREATIVE STUDY

Students have opportunities to experiment with graphics and illustration, digital photography and film, digital media, screen printing, DJing, painting, drawing and music production.

APPROVED PROVIDER

This education programme was set up in 2008 by the charity MAP as an approved off site provider and offers Edexcel BTEC qualifications as well as Edexcel functional skills certificates.

PROGRESSION OPPORTUNITIES

MAP Education courses are delivered in an environment that develops creativity, confidence and academic skills with the aim of readying learners to return to school or progress on to further education.

CURRICULUM

We work with students, schools and homes to make sure that the choice of course and qualification is right for the learner; supported through a clear referral process, trial sessions and initial assessment, each student at MAP has access to a range of qualifications and units to suit their learning requirements.

MAP has supported us with some of our most disengaged pupils and I have seen some real successes at MAP with the pupils that I have referred and supported. Pupils have developed their confidence, social skills and better engagement with education and learning.

CREATIVE MEDIA & MUSIC

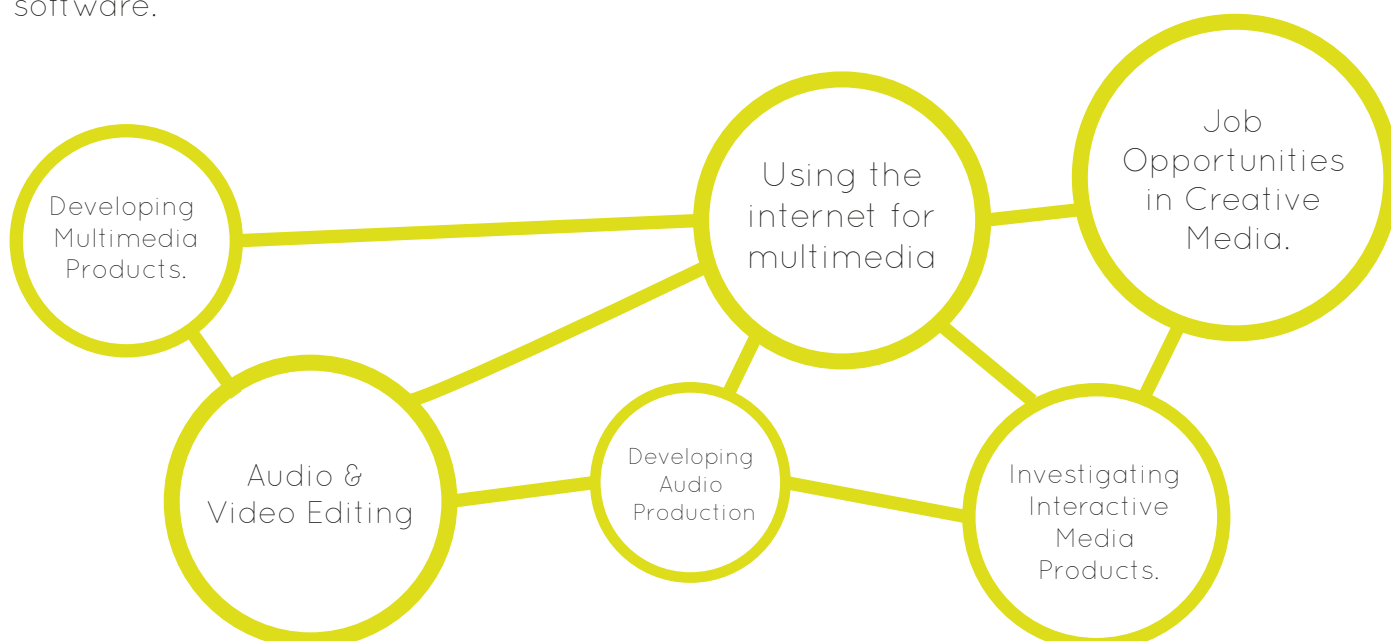

The music course gives learners access to a wide range of opportunities in music production and creative media. Throughout the course, learners complete a BTEC in Creative Media Production which comes in different sizes to suit each learner's individual requirements:

BTEC Qualification Title	Number Of Study Hours	Qualification Number
Entry Level Award in Creative Media Production	45 Hours	500/8484/7
Award in Creative Media Production	60 Hours	500/8482/3
Certificate in Creative Media Production	145 Hours	500/8423/9

Also available are short term courses (10 - 30 hours) which will allow clients to use our services on an ad-hoc basis for sixth day cover or respite. These are primarily targeted at KS3 students, but can be accessed by KS4 if desired.

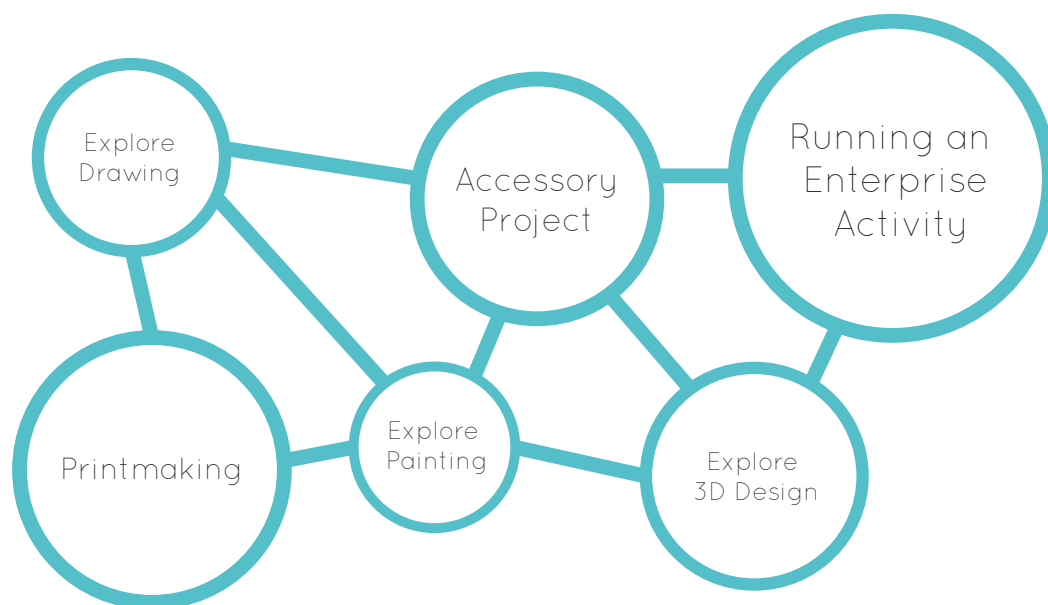

Below are some examples of the units that make up these qualifications. These units provide learners with the opportunity to use traditional materials like oils, charcoal, pencil and paints, alongside more modern materials like art-oriented computer software.

ART & DESIGN

On the art course there is an exciting selection of activities and areas of study, ranging from garment printing and photoshop through to more traditional techniques like oil painting. Throughout the course, learners complete a BTEC in Art and Design which comes in different sizes to suit each learner's individual requirements:

Above are some examples of the units that make up these qualifications. These units provide learners with the opportunity to use traditional materials like oils, charcoal, pencil and paints, alongside more modern materials like art-oriented computer software.

BTEC Qualification Title	Number Of Study Hours	Qualification Number
Entry Level Award in Art & Design	45 Hours	500/8484/7
Award in Art & Design	70 Hours	500/8482/3
Certificate in Art & Design	130 Hours	500/8423/9

Also available are short term courses (10 - 30 hours) which will allow clients to use our services on an ad-hoc basis for sixth day cover or respite. These are primarily targeted at KS3 students, but can be accessed by KS4 if desired.

MATHS

ENGLISH

The functional skills course builds upon examples that are already found within the creative activities undertaken at MAP, providing a practical way for students to relate to the maths and English activities that they sometimes struggle with. Building on these examples, we give students one to one support in working through stand alone functional skills exercises with a range of computer based, paper based, and practical activities.

Qualification Title	Number Of Study Hours	Qualification Number
Edexcel Functional Skills in Mathematics at Level 1-2	45 Hours	500/8906/7 500/8907/9
Edexcel Functional Skills in English at Level 1-2	45 Hours	500/8700/9 500/8683/2

OUTCOMES

Below are some examples of the skills and awarenesses learners will develop through their engagement with the Maths and English qualifications, all of which can then be reapplied to the undertaking of a practical, creative project, such as working out the costs of printing your own t-shirt designs, or a project involving the release of music online:

Presenting information, points of view, and ideas clearly and logically.

Utilising information contained in texts from different sources.

Responding appropriately to comments and requests.

Recognising when a situation has aspects that can be demonstrated with maths.

Deciding on the appropriate methods and tools, including ICT, to use in a situation.

Communicating results and solutions.

MAP EDUCATION GRADUATES

A number of graduates from the MAP 11-16 Education programme have even returned to the MAP charity as volunteers, demonstrating the overwhelmingly positive impact of their experiences here. This has led to MAP setting up an apprenticeship scheme to support the development of young creatives.

WIDER ARTS ACTIVITIES

Aside from the education programme, the MAP Charity also carries out a wide range of arts and music activities with professional and developing artists and university students. These other activities are of considerable value to the education programme as they offer the students a unique experience that raises aspirations and highlights options for progression.

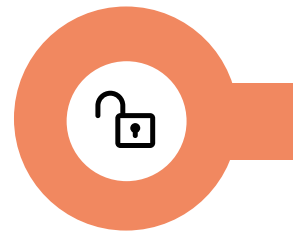

MAKING A REFERRAL

If you would like to come for a visit, or arrange a trial day then please get in touch at: info@mapcharity.org or 01132 468 468. We can send through more information, the learner handbook, and referral paperwork. There is also further information available on our website at mapcharity.org

WHAT DO OUR STUDENTS THINK?

“In school there’s more going on...so you get distracted easily, but in MAP, it’s smaller. When we’ve got an issue or a problem they’re there for you, and they know what you’re about. It’s a good vibe, and everyone gets along...It’s helped me to figure out what I have to do in life, and what not to do in life... After MAP, I’m going to go back to school.”
